

Welcome to Kindergarten Club

Kindergarten is an exciting time for parents and children alike. You are seeing your little one grow up and head off to Elementary School, taking a major step in the transition to “student.” To assist both you and your child with this transition, we have created Kindergarten Club, our unique program to further prepare your child for this important milestone.

Kindergarten Club, which typically starts in January during the last year of preschool, is designed to help your child become more comfortable with the transition into Kindergarten. Our Kindergarten Club will give your child exposure to a variety of Kindergarten readiness skills: writing practice, imagination development, journaling, science, math and literature-based activities. Through our thoughtfully planned curriculum, your child will develop longer attention and concentration spans while learning the basic concepts that are expected in Kindergarten.

Our students are very proud to be a part of Kindergarten Club. They wear their special Kindergarten Club T-shirt and personal name badge with pride. By June they have a wonderful collection of the special activities they’ve completed, compiled in their K-Club Book.

We believe Kindergarten Club reduces or eliminates the anxiety and apprehension children may experience with the thought of leaving the comfort of their friends and teachers at preschool. Kindergarten Club helps to build confidence and creates a smooth and worry-free transition into elementary school for all.
